

*January 23, 2013*

The Planning Consortium for the Refurbishment of Puerto de la Cruz and Sinpromi have signed an agreement to guarantee universal accessibility, both in public spaces and in the private facilities of the holiday destination.

Through this agreement, Sinpromi will advise the heads of the different lines of action, included in the Modernisation Plan so that the facilities will achieve the Universal Accessibility Certification and thus raise the quality of the holiday services and infrastructure of Puerto de la Cruz.

Sinpromi is classified as an expert advisor in Universal Accessibility under standard UNE 170001-2: 2007, by the Spanish Standardisation and Certification Agency, AENOR, thus guaranteeing quality in the management and application of the regulations.
