

Designing tourist services that meet the needs of all visitors is beneficial to all members of society. Thus, **accessibility** is indispensable in terms of achieving **excellence** in tourism. In the tourism arena, we strive to offer residents and visitors a variety of accessible spaces and services, encouraging all members of society to visit our island's destinations and establishments.

We support activities that contribute to the enjoyment of tourism by all people. In doing so, we make our services available to public and private institutions that wish to improve their tourism products and services, fostering the island's reputation as a **quality** destination.
